

GROUP PROJECT Generative AI Usage Form

Your Information:

Your name	Dohyun Lee	ISYS2110 COMP9110
------------------	-------------------	------------------------------

Lab number	2	Group number	4
Tutor name	Vittoria		

	Student Name	Unikey	Signature
1	Dohyun Lee	dlee4243	
2	Raeval Hadi	mhad2934	
3	Hadif Hammam Ajwad	hahm2058	
4	Yuhang Ding	ydin4490	
5			

You are going to inform the teaching team about the Generative AI platforms (like ChatGPT, Gemini, Bing's Copilot) you have used during the group project. You should specify the situation in your project when you used these tools, such as generating ideas and defining the project scope, analysing survey results, preparing presentations, drafting reports, etc. I have created a template (example) for this report. Please copy the table format from page 2 to page 3 of this form and fill in your details accordingly. **If you've selected "Yes" in the following question, you must provide us with the prompt details.**

Tick the box to indicate the situation of your group in terms of using Generative AI in this group project.	Yes No
---	-------------------------

Project group's use of Generative AI

Tool:	ChatGPT
When to use?	To learn syntax and format of HTML and CSS
By whom?	Raeval Hadi, Hadif Hammam Ajwad
Please give a few prompts that you have used:	
If I am to write CSS code outside from HTML code, how do I call the CSS file from HTML code?	

Tool:	ChatGPT
When to use?	To get example CSS code that will enable styled HTML design
By whom?	Dohyun Lee, Yuhang Ding
Please give a few prompts that you have used:	
Assume I am making a web page, where top side is divided from body page so that its colour is different and have multiple buttons. Can this be built by only using HTML? If yes or if not, give me one example of the code that will enable that feature.	

Tool:	ChatGPT
When to use?	To distinguish if our chosen Functional / Non-Functional Requirements are actually
By whom?	Raeval Hadi
Please give a few prompts that you have used:	

Imagine writing a functional requirements and non-functional requirements for software development.

Is customer support system a functional requirement?

Is fast response time of software a non-functional requirement?
